Title: Regarding construction of a new bypass in Attingal on NH-66 in Kerala-laid.

ADV. ADOOR PRAKASH (ATTINGAL): I would like to draw the attention of the Government towards an important matter related to the construction of a new bypass in Attingal on NH-66 in Kerala. The Thiruvarettukavu temple is located on the alignment area of the proposed Attingal bypass in Thiruvananthapuram district. The alignment was done without making any damage to the main temple building but Thiruvarettukavu Temple portion of building at south west corner is getting affected and the seeveli patha (walkway inside temple compound) is also affected. In order to keep the structures of temple safe by keeping the alignment unchanged it's suggested to construct a flyover at this location. The flyover may be constructed for a length of about 500 mts so that the service road on both sides could be accommodated under the flyover. Hence, the structure of Thiruvarettukavu temple will not be disturbed and will also provide more comfortable traffic movement. I request the Government to convene a meeting of all the concerned to discuss the matter and look into the execution of this long pending project at the earliest.
