Title: Regarding relocating of students in Indian colleges due to impact of Ukraine War.

**SHRI P.V. MIDHUN REDDY (RAJAMPET):** Sir, thousands of students not only from Andhra Pradesh but also from other parts of the country who had been pursuing medical education in Ukraine have been evacuated. Their future is very uncertain. We do not know when things will become normal. Most of them are poor students. Their parents have put their life-time earnings into their medical education.

So, I am making a demand to the Government through you that these students may be relocated in Indian colleges. The tuition fees of medical education are very high in our country. It should be feasible for them to get admission in the colleges. The Government should devise a mechanism for all the students who have come back as a one-time case.

They should be relocated in various colleges in our country. The Government should also take steps to build more medical colleges. This will also encourage the States. Thank you.
