Need to shift boarding point and construction of flyovers on railway gate at Faridkot Station

Shri Mohammad Sadique (Faridkot): Thank you, Sir. In my constituency Faridkot, Moga is an important town. It is district headquarter. Railway Station is located in the centre of the town. A loading point is located near the station. The entire area witness heavy traffic, especially the area of Gandhi Chowk. Schools, banks, cow-sheds are located in the area. This road leads to Faridkot, Ludhiana etc. It also leads to bus stand.

However, heavy trucks ply in this area due to loading point present here. Heavy traffic makes the matter worse. Several accidents have taken place here and there has been loss of human lives.

To save precious human lives, the DM of the town has been intimated and request has been made to shift the loading point to Dagrū or Ajitwal. It is 10-12 km. long area and it can be shifted there.

There is also a railway crossing near Gandhi Chowk. It leads to congestion when the gates are closed. So, a flyover or an underpass should be constructed here.

Thank you.
