

Regarding establishment of a Medical College and Multi-Speciality Hospital in Sivakasi-laid

SHRI B. MANICKAM TAGORE (VIRUDHUNAGAR): Today, I present a transformative vision for our Virudhunagar constituency: the establishment of a state-of-the-art medical college and multispeciality hospital in Sivakasi. This initiative aims to enhance medical care and serve as a hub for education and research, ensuring high-quality healthcare and advanced medical training accessible in our district. Currently, our region faces significant healthcare access challenges, with advanced medical facilities located far away, causing financial and physical burdens. A multispecialty hospital will provide comprehensive local medical care, reducing the need for long-distance travel for specialized treatment. The proposed Medical College will offer diverse medical courses, nurturing a new generation of skilled healthcare professionals dedicated towards serving our community. This project will generate significant employment opportunities, stimulate the local economy, and foster research and innovation in medical science. The total estimated cost is approximately ₹1000 crore, allocated across various components of the project. To realize this vision, we need the united support of all stakeholders. I urge each member of this esteemed assembly to back this vital initiative. Establishing a Medical College and Multispecialty Hospital in Sivakasi is a promise for better health, advanced medical training, and a brighter future for our community.
