

Need to strengthen embankments along Gandak River in Bihar- Laid

DR. SANJAY JAISWAL (PASCHIM CHAMPARAN): I draw attention to the recurring floods in North Bihar caused by heavy water discharge from the Valmikinagar barrage on the Gandak river. In 2023, this led to severe damage in West Champaran, inundating fields and settlements. I urge the Government to expedite the strengthening of embankments along the Gandak river to mitigate flood risks and ensure timely relief for affected farmers.
