

Need for establishment of an Ayurvedic Medical College in Kandhamal district of Odisha ? Laid

SHRI SUKANTA KUMAR PANIGRAHI (KANDHAMAL): I would like to bring Government's attention to a pressing matter regarding the establishment of a new Ayurvedic Medical college in the tribal district of Kandhamal, Odisha. This region is renowned for its rich biodiversity and abundance of medicinal herbs, making it an ideal location for an institution dedicated to the study and research of Ayurveda. The objectives of this proposed college would be to provide education and training in Ayurvedic Medical, and facilitate research in the field of Ayurveda, with a focus on the medicinal herbs found in the Kandhamal region, to establish a conservatory for the medicinal herbs found in the region and promote sustainable harvesting practices to ensure their availability for future generations and to provide healthcare services to the local residents, utilizing the principles of Ayurveda and promoting holistic health and wellness. I urge the Minister of AYUSH to consider this proposal and provide necessary support for the establishment of the Ayurvedic Medical college in Aspirational Kandhamal district. This initiative would not only promote the development of Ayurveda but also contribute to the socio-economic development of the region.
