

Need to address the plight of farmers in the country ? Laid

SHRI AMRINDER SINGH RAJA WARRING (LUDHIANA): I am deeply concerned about the plight of farmers in various parts of our Country. For years now, the brave farmers of Punjab, Haryana, and UP have been protesting in harsh conditions. They demand what is rightfully theirs? fair prices for their crops, dignity in their work, and respect for their labour. I stand here in solidarity with farmer leaders who have been sitting on a fast unto death & several farmers who have made the ultimate sacrifice as a testament to the dire urgency of this cause. These demands are so pressing, because agriculture in India is failing. Once a proud sector, it has become a loss-making endeavour. Rising input costs, falling market prices, and the lack of Government support have left farmers struggling for survival. I urge Central Government to act now and when they sit with farmer leaders on 14th February they must do so with a desire and honesty to fulfil their just demands and provide them relief.
