

Regarding development works on NH-66 in Kerala

**ADV. ADOOR PRAKASH (ATTINGAL):** Thank you, Sir.

I would like to draw the attention of the House towards the delay in the construction works for the development of National Highway-66 in Kerala. The development works of Kazhakkootam-Kadambattukonam reach of this National Highway which comes under my constituency is getting very delayed. The construction works at this reach is getting delayed due to many reasons.

Comparing to other reaches of NH-66 in Kerala, Kazhakootam- Kadambattukonam reach needs more attention and direction from the National Highway Authority of India as it has got a lot of traffic diversions at various structures. But it seems that the NHAI and the contracting company have not properly studied about the project implementation at this reach.

The public support has considerably decreased due to the uncompleted works and people suffer a lot on a daily basis because of never ending work and diversions. Accidents here are increasing day by day. NHAI has to take action to complete the work as fast as possible.

I request immediate intervention of the Government for the completion of this project without delay.
