

Regarding preparations for Kumbh Mela in Nashik

SHRI BHASKAR MURLIDHAR BHAGARE (DINDORI): Hon?ble Speaker Sir, Simhastha Kumbh Mela, 2027 is going to be organized at Trimbakeshwar, Nashik. During this, the pilgrims take a holy dip in Godawari River. But, water of Godawari is totally contaminated as sewage water and industrial waste water is being released in the river ravine. In the eastern part of Nashik city and villages like Chandori, Saykheda, Nandur, Madhaneshwar, the river water quality is extremely deteriorated and it has a foul smell too. The aquatic animals like fish etc. are dying in this river and we have to save and conserve it immediately.

This Kumbh Mela will be organized during monsoon. So, we have to be cautious about the mud, flood and heavy rains. We should also ensure the basic infrastructure like hospitals, roads, bridges, and other amenities needed for tourism activities there.

Thank you
