

## **Need for implementation of Pradhan Mantri Swasthya Suraksha Yojana in Miraj Region of Sangli, Maharashtra-Laid**

**SHRI VISHALDADA PRAKASHBAPU PATIL (SANGLI):** Miraj taluka, located within my parliamentary constituency of Sangli, serves as a crucial gateway between the Southern and Central states of India. This constant flow of people has led to the organic development of Miraj as a prominent medical hub, housing numerous private and public health institutions. These institutions cater not only to the medical needs of Maharashtra but also to neighbouring states and beyond. To address the regional disparities in the availability of affordable and quality tertiary healthcare services and to strengthen medical education facilities, I request the Ministry of Health and Family Welfare to implement the Pradhan Mantri Swasthya Suraksha Yojana in the Miraj region of Sangli. This initiative will facilitate the establishment of an AIIMS, equipped with state-of-the-art modular OTs, diagnostic facilities, and 15-20 super specialty departments. Additionally, it will lead to the upgradation of Government Medical Colleges in the region, thereby expanding state-of-the-art healthcare infrastructure, increasing the number of beds, and offering more UG and PG medical seats. Both these measures will create ripple effects, enhancing the overall medical capabilities and educational opportunities for students in Sangli and surrounding regions.
