

Title : Need for cement concrete paving of dilapidated rural roads constructed under PMGSY in Gadchiroli Parliamentary Constituency, Maharashtra-laid

**DR. NAMDEO KIRSAN (GADCHIROLI-CHIMUR):** I would like to bring to your attention that the Pradhan Mantri Gram Sadak Yojana (PMGSY) was launched by the Central Government in 2000 to develop rural roads. Under this scheme, asphalt roads were constructed from 2000 to 2014. Currently, due to inadequate maintenance and repairs, these roads have deteriorated significantly. Asphalt roads typically last only 3 to 5 years, and in high-rainfall regions, they degrade even faster. To ensure long-term durability and better road infrastructure, these roads must be upgraded with cement concrete paving. Therefore, I request the Hon'ble Minister for the approval for the cement concrete paving of deteriorated rural roads constructed under the PMGSY (Core Network) between 2000 and 2014 in Gadchiroli Parliamentary Constituency.
