

Regarding need to create ecological parks in all the districts including Kalahandi and Nuapada districts of Odisha-Laid

SHRIMATI MALVIKA DEVI (KALAHANDI): I would like to request our honourable Minister of Environment, Forest and Climate Change to please consider making and introducing ecological parks in all districts of Odisha covering 10-20 acres of land. This park will not only improve the environment and be a place for people to admire and appreciate beauty of nature but will also help climate change and help us to live a healthier life. A lot of Government lands are turning into big dump and garbage yards which is very sad for our children but this will also teach children from young age how important our environment is for our future generations to have a good and healthy life. They will also help in learning to preserve our Mother Nature and importance of planting trees. Please make two at least to start with in my aspirational district of Kalahandi and Nuapada in my Kalahandi constituency.
