

Need to establish a Trauma Care Centre in AIIMS, Mangalagiri in Andhra Pradesh.-laid

SHRI BALASHOWRY VALLABHANENI (MACHILIPATNAM): The speedy progress of various works being done at AIIMS, Mangalagiri, is appreciable. And, achieving 25 lakh outpatient consultations clearly indicate the rapidly gaining popularity of AIIMS, Mangalagiri. I wish that the same trend be continued in inpatient services as well and excel in academics and ultimately achieve the objective of making AIIMS, Mangalagiri, an institute of national importance. It is welcome that the Government has opened many departments and created many facilities in AIIMS, Mangalagiri. But, Trauma Centre has not been set up which, I strongly feel, is very critical and important since this institute is very near to National Highway and many road accidents taking place in this area. So, Trauma Centre is the need of the hour. Hence, I appeal to the hon. Prime Minister and hon. Health Minister to kindly ensure that Trauma Care Centre is set up at AIIMS, Mangalagiri as early as possible.
