

Need for legislation to provide employment to more number of local people in industrial establishments.-laid

SHRIMATI MALVIKA DEVI (KALAHANDI): I would like to request our honourable Minister of Labour and Employment to make strict rules that ensure the companies to hire people from the local districts rather than outside the District. Few companies have been there in my Parliamentary Constituency which have been hiring people from outside the Parliamentary Constituency ignoring the capability and intelligence of local people which leads to huge number of migration from my District resulting in hampering to the overall development of the area. It is one of the biggest problems that both districts of Kalahandi and Nuapada of my Parliamentary Constituency face. When new companies set up in our districts, local peoples use to aspire for employment opportunities but their hopes are shattered when outsiders get the jobs in their hometowns. So, I would like to request the Government to look into this and make stricter rules to give recruitment to the more number of local people in companies set up in Kalahandi Parliamentary Constituency, Odisha.
