

**Need to review the decision to demolish the Rajiv Gandhi Speciality Hospital at Agatti in Lakshadweep until alternative health facilities are put in place- Laid**

**SHRI HAMDULLAH SAYEED (LAKSHADWEEP):** The Lakshadweep Administration has initiated steps toward the demolition of the Rajiv Gandhi Speciality Hospital, Agatti, a healthcare facility that has for years served as a lifeline for the people of Agatti and neighbouring islands. This hospital is accessed daily by a large number of islanders for essential and emergency medical needs, and its services are critical due to the geographical isolation of Lakshadweep and the limited availability of advanced medical facilities in the region. It is a matter of deep concern that the proposed demolition is being undertaken without ensuring any adequate substitute arrangement for the continuation of patient care. The absence of an alternative facility or interim healthcare infrastructure poses a serious risk to the health and well-being of the local population, including women, children, the elderly, and those with chronic or emergency medical conditions. I urge the Government to immediately intervene in the matter, halt any demolition until proper replacement facilities are established, and ensure that uninterrupted healthcare services are provided to the residents of Agatti and surrounding islands.
