Title: Need to restore the originating and terminating station for train No. 11057/11058 running between Dadar in Maharashtra to Amritsar.

SHRI A.T. NANA PATIL (JALGAON): The Train No. 11057/11058 to Amritsar was running from Dadar station. Recently, the train has been diverted to Kurla, Mumbai LTT station instead of Dadar. Most of the commuters of this train are VVIPs from Maharashtra and M.P. State, Ministers, Govt. Officials, businessmen and daily vendors. This is a popular train running daily on right time without any delay in journey. Dadar Station is more convenient for everybody to catch the train after completing the day work. There is no other train from Dadar or Mumbai CST during this time for the halts at this station.

Hence, there is heavy demand from the public, workers, vendors and VVIPs that this train should either originate and terminate at Dadar station by restring the previous schedule or at least from Mumbai CST which will be convenient to all. As it is very important train, the people/commuters of this train of the region are very much agitated and planning to sit on dharna, etc., if their demand is not considered.

Therefore, I urge upon the Railways to restore the starting station of this train from Dadar only or otherwise from Mumbai CST station, in the public interest.
