Title: Issue regarding flying of an unidentified object in various part of Kerala.

SHRI MULLAPPALLY RAMCHANDRAN (VADAKARA): Sir, I wish to bring to the attention of this august House a phenomenon that has caused great fear and anxiety in the minds of the people of Kerala.

An unidentified flying object in the form of a fire ball is said to have been sighted in various parts of Kerala on the night on 27th February, 2015. This unusual phenomenon was widely reported by the visual and print media including mainstream newspapers.

The locals said they felt tremors and witnessed sounds with the passing of the 'object'.

There are evidences of impact seen at various spots which have left signs of fire.

Reports assume it to be meteorites or unidentified flying objects. The common people are in panic, not knowing the actual facts. The scientific community in Kerala is also seized of the happening, but a scientific explanation is still awaited.

Under the circumstances, I urge upon the Ministry of Science and Technology to ascertain the facts and come out with the actual finding at the earliest.
