Title: Need to ban installation of 4G mobile towers in open spaces.

DR. KIRIT SOMAIYA (MUMBAI NORTH EAST): Permission is being accorded to mobile companies for installing 4G towers in open places including gardens, hospitals, schools, playgrounds, green zones etc. violating all rules, regulations, guidelines and green norms. It is a dangerous trend. When various courts have passed strictures, it is quite surprising how permissions are being given to mobile companies for installation of 4G towers in open places as mentioned above. Every mobile company wants to construct separate towers for their network. Some companies have sought permission to install 4G towers in CRZ area also. It is a moot point why multiplicity of such towers using unnecessary multiple infrastructure? Common people, senior citizens have raised objections against installation of 4G towers in open spaces around their localities. The Government is to take strict measures and issue instructions banning installation of 4G towers in open spaces.
