Title: Need to establish a medical college in Kasargod, Kerala.

SHRI P. KARUNAKARAN (KASARGOD): Madam Speaker, I would like to raise an important issue in this House.

A Central University has been functioning in the State of Kerala and it is in Kasargod. At the time of the establishment of the Central University, the then Government had promised to start a Medical College because the Central University can start or function a Medical College or an Engineering College or a Law College. It has become important because the Human Rights Commission has made the suggestion that there should be a Medical College as medical facilities are very less there and people have to go to Manipal or Calicut for the same. It is not only that. A large number of endosulfan victims are also in the same district. As a result, the Human Rights Commission has taken a decision and the Government of Kerala has also given sufficient land to this effect but the Government has not taken further steps in this regard.

So, I request the Government to take necessary steps urgently.
