title: Need to upgrade and modernise railway stations at Dahanu Road, Vasai, Nalasopara, Virar, Palghar, Boisar in Maharashtra.

SHRI CHINTAMAN NAVASHA WANGA (PALGHAR): The population of new Palghar district in Maharashtra is increasing rapidly. Due to rapid increase in population, Vasai-Virar Municipal Corporation was established recently. New Palghar district is also developing rapidly. Tarapur Atomic power Station is coming in the New Palghar District. Boisar City is an industrial city. New industries are coming up in Palghar and Dahanu Tehsil area. The Western Railway line is going through my Palghar Lok Sabha constituency and new suburban trains are running from Churchgate to Dahanu Road, Vasai, Nalasopara, Virar, Palghar, Boisar Stations. These Railway stations are very crowded and require modification and upgradation. The Vasai Railway Station is very important Railway station as long route trains going to southern India, northern India, eastern India are stopping at Vasai Station, but there are no facilities at this station. Therefore, I request for upgradation of these railway stations including Palghar.
