3207 Central Excises AUGUST 18, 1960 (Conversion to Metric Units) Bill [Shri Abid Ali]

person who was holding the light was injured slightly. An enquiry held by the Regional Inspector of Mines revealed that the accident was a case of misadventure.

The mine employs about 500 workers and raises 9,000 tons of coal per month. It is under the charge of a 1st class Manager assisted by a 1st class Assistant. The work in the mine was temporarily stopped as certain dams were required to be constructed to prevent danger from inundation. This has now been done and normal work resumed.

Shri Chintamoni Panigrahi (Puri): Sir, incorrect things have been said in this statement. The labourers there have represented six months ago that the mining condition in the mines was not very safe because the manager was cutting down the pillars without sand-stowing. May we know whether a mining inspector from the Government of India really inspected that mine before?

Shri Abid Ali: The mine was inspected in June last. This time also, when the inspector was there some representation was made to him. Some allegations were made, and he says that all of them were enquired into and found baseless.
